

YOUR HOTEL SHOULD BE MOBILE PRINT READY

No App Required · No Logins · No Passwords · Totally Secure

■ WHAT IS EPRINTIT™?

A **cloud-based, secure mobile printing** platform that lets hotel guests print from any phone, tablet, or laptop — without touching the printer or involving the front desk.

Guests submit files via:

- Web portal (scan QR code on the printer)
- Free Mobile App — 15M+ downloads
- Email to ttitel@eprintservice.com

A **secure release code** is generated.

Guests enter it at the kiosk — no pages print until they arrive. One code covers all documents sent.

■ WHY EPRINTIT BEATS THE COMPETITION

- **Stronger security:** 256-bit encryption vs. competitor 128-bit
- **Better quality:** PDF format vs. JPEG — full document fidelity
- **Batch printing:** Up to 30 files under one single access code
- **Easy to use:** Designed for non-technical guests
- **Proven platform:** Huge millennial adoption — app already on their phone
- **Zero exposure:** No pages ever left unattended at the printer
- **Zero friction:** No APP download, no membership required

The NEW ePRINTit SaaS technology was **built with the guest experience in mind.**

■ WHY DIRECT-TO-PRINTER FAILS YOUR GUESTS

Every device connects differently

Guests constantly need front-desk help to configure their device — creating frustration and staff burden.

Guests print unnecessary pages

Without a preview, guests over-print. ePRINTit lets guests review before printing, saving toner and paper.

Tiny printer screens with limited options

The small display on standard printers is hard to read and offers few controls — a poor guest experience.

Wrong printer selection

Guests often connect to the wrong printer, sending confidential documents to unintended locations.

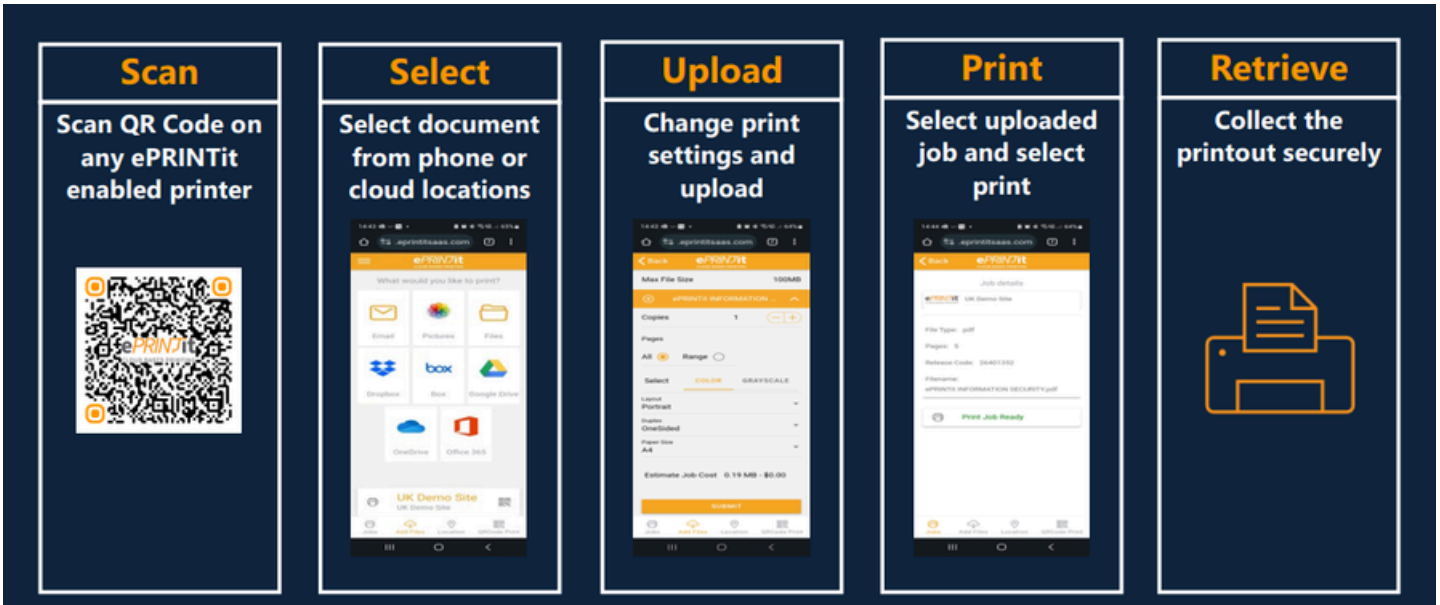

Documents remain in the print cache

Previous print jobs stay accessible — allowing other guests to retrieve confidential information.

Bottom Line: Direct printing means more front-desk involvement, frustrated guests, wasted supplies, and real security risks. **Our SaaS solution eliminates all of it.**

■ HOW IT WORKS

SIMPLICITY - A MODERN GUEST EXPERIENCE

Guests can also **scan the QR code** on the printer to open the web portal instantly — no email, no app download required.

■ HARDWARE & SETUP

- Business Center kiosk or standalone tablet + any printer
- Includes Mobile Apps, Branded Web Portal & email print
- 5-year warranty · Windows 11
- Desktop QR Code display available
- Requires Wi-Fi to connect back-end to printer

Installation and master setup are additional.
